

## COMP20030 WEB DESIGN PROJECT 2018

Jack Millar 17331946

### Option 2 - Rowing demographics [river liffey group]

- Global page assets menu, bottom header for ease of user
- Interactive menu links to webpages, tracks which page is in use and continues to load media from last pages [home page]
- Buttons when hovered over, invert colours and other aesthetic changes to signify response
- Favicon to distinguish from other websites
- Main logo acts to return to mainpage , from any page
- Titles of articles links to page type i.e. for beginners → starting off
- Live twitter feed specified to topic , able to add to twitter website ,refreshes twitter mark without needing to refresh page
- Page uses fluid and responsive assets depending on media type and format requirements
- Global page bottom header links to homepage and contact us form but also holds embedded information,[website name and email address]
- Photos turn opaque to signify scroll over , mouse pointer turns to pointer hand , several link to relevant sites and locations on relative scroll bar
- Photos grow when clicked on to be easier to use
- Google maps to location and satellite view of target location [liffey group]
- Links to respective club websites and most relative page on said sites for target demographic
- Directions button [change in css when used] to link to google maps from location to default location [UCD ROWING CLUB]
- Button to download meal planner
- Javascript , bmi calculator , interactive textboxes and output
- Textbox sizes to webpage , holds paragraphs
- Pdf file available to download on click
- Contact form
- Page develops on relative load time , text progresses colour change etc
- Form distinguished from main pages and transparent for ease of use
- Form checks if data input is valid [requiring @ for email]
